**QUALITY MEDICAL IMAGING**

Roger Faselt, founder and president of Las Vegas-based Quality Medical Imaging (QMI), saw an entrepreneurial opportunity nearly five years ago, which helped him to establish one of southern Nevada's leading medical imaging companies.

QMI, a licensed and certified portable medical imaging company, is one of a select few businesses within the valley offering portable X-rays, diagnostic ultrasounds, EKGs, Holters, bone density testing, spirometry and monitoring services as well as portable PIC catheter placement. It is also the first local, mobile company to offer bedside pick-line services.

Faselt, who has been working in the medical industry for more than 15 years, credits the success of his business to his qualified staff, state-of-the-art equipment and the ability to mobilize services to help individuals in need of imaging services at hospitals, other medical facilities or even at home.

In addition to operating his company, Faselt is actively involved in a number of professional organizations, including SDMS and ASRT. He has served as a guest lecturer on multiple occasions for a variety of health classes at UNLV and has served as an integral part of Community College of Southern Nevada's efforts to develop a sonography program, which was implemented into the college's curriculum five years ago.

Faselt earned his bachelor's degree in imaging and education from UNLV and completed the sonography and radiologic technology programs at the University of Iowa. He is ACR accredited and is licensed in radiology, sonography, vascular sonography, abdominal obstetrics and neurology.
